EDUCATION

IIIT Rajiv Gandhi University of Knowledge Technology
Bachelor of Arts in Electronics and Communication (CGPA:7.6)

Kadapa, AP
April 2021 - May 2025

IIIT Rajiv Gandhi University of Knowledge Technology
MPC Pre University Course (CGPA:9.1)

Kadapa, AP
September 2019 – May 2021

Vivekananda Municipal High School
SSC(CGPA:10.0)

Madanapalli, AP
May - 2019

EXPERIENCE

Embedded System Engineer

May 2024 – July 2024

Techno Tran

Remote

- Developed and tested embedded software for micro controllers, enhancing system performance and reliability.
- Utilized Micro python and assembly language for programming, optimizing algorithms for real-time processing and low power consumption.
- Designed and implemented automated test scripts to validate system functionality, improving the efficiency of the testing process by 30 percent.

PROJECTS

Anti-Theft Alarm System | PIR Sensor, LCD Display, Arduino

January 2024 – June 2024

- Designed and developed an anti-theft alarm system utilizing a Passive Infrared (PIR) sensor to detect motion and trigger alerts.
- Integrated an LCD to provide real-time status updates and alerts, enhancing the user interface and system feedback.
- Implemented embedded programming in C/C++ to manage sensor data, control alarm triggers, and display messages, ensuring responsive and reliable operation.
- Optimized system performance to minimize false alarms and improve detection accuracy, demonstrating effective problem-solving and technical skills.

Automatic Railway Gate System | Arduino, IR Sensor, Servo Motor

July 2023 – November 2023

- Developed an automated railway gate system using Arduino, IR sensors, and a servo motor to enhance railway safety and efficiency.
- Programmed the Arduino to process input from IR sensors, automatically controlling the servo motor to open or close the gate based on train detection.
- Designed and implemented the system to ensure timely and accurate gate operation, reducing human intervention and potential for error.
- Conducted testing and troubleshooting to refine system performance, achieving reliable gate control with minimal delays.

TECHNICAL SKILLS

Languages: C/C++

Courses: Embedded Systems

Developer Tools: VI EDITOR, Keil 4

ACHIEVEMENTS

1. I have been selected for the National Means-Cum-Merit Scholarship Test and got a scholarship.
2. I worked for Helping Hands Organization (HHO) and served many people with my services.
